VT-630 MS Flooring Adhesive

Issuance date: 27/12/11

Revision date: 09//20

VT-630 MS Flooring Adhesive

One-component Elastic Wood Flooring Adhesive

DESCRIPTION

PHYSICAL STATE Soft Paste

COLOR Light brown

TACK-FREE TIME 20 - 40 minutes

WORKING TIME

~ 30 minutes (at 25 °C & 50% R.H.)

PACKAGING

- 600 mL/sausage sachet
- (20 sausages/carton) 24 kg/pail (3x8kg packs per pail) (24kg ≈ 15.3 Liter)

SHELF LIFE

12 months

STORAGE Store in a dry and cool place with temperature below 30 °C

APPLICATION TEMPERATURE

15 °C to 35 °C

SERVICE TEMPERATURE -20 °C to 90 °C

E	 Single-component – Ready for use, no mixing required Resistant to aging - Permanently elastomeric Free of water, 100% solid content - No dimensional changes in wood Free of solvent - Non-teching & no shrinkage Free of isocyanate - Non-hazardous Low odor & low VOC - SGBPLS certified, meets LEED/SCAQMD rule 1168 Notched trowel ridges hold firm - Minimize hollow spots by bridging gaps Rapid strength build-up and short curing time - Fast job completion Easy surface clean up - Easy cleaning on prefinished wood Non-flammable, non-hazardous, stable shelf life - Easy storage 				
	APPLICABLE TESTS / STANDARDS	 VT-630 meets the requirements of: Singapore Green Building Product Labelling Scheme (SGBPLS) Low VOC - USEPA Method 24 under SCAQMD Rule 1168 			
	APPLICATION	Ideal for bonding wood floors to concrete, concrete screeds, cement / sand screeds, anhydrite screeds, plywood, cured leveling compounds, epoxy membrane, OSB (underlayment grade), particle board, gypsum board, ceramic tiles, stone, terrazzo, radiant heated subfloors, metal decking, steel, aluminum, etc.			
w to use)	TYPES OF FLOORING	Most types of wood flooring including but not limited to:• Solid Wood Plank/Strip• Laminated Plank• Parquet• Bamboo• Wood Blocks• Acrylic Impregnated Wood• Wood Mosaic• Plywood• Engineered Wood• Others			

An eco-friendly wood flooring adhesive formulated with advanced MS Polymer technology, eliminating common problems associated with traditional polyurethane adhesives. It cures on exposure to atmospheric moisture, and quickly forms a tenacious but elastic bond on wood flooring and wall decorative materials. When cured, it is waterproof and is not adversely affected by exposure to moisture or water. Its elastic characteristic allows the wood floor to expand and contract without adhesion failures.

TECHNICAL

DATA

Rase

Curing system

The adhesive can be troweled easily. Its non-slump formula enables notched trowel ridges hold firm, bridging gaps between wood flooring and sub floor and reducing floor hollowness problem. Since it does not contain water or solvent, it will not cause dimensional changes in wood. It is also safe because it does not contain hazardous materials like isocyanate, and has a very low VOC content.

· Moisture curing

: One-component MS (Modified Silane) Polymer

DATA	Specific gravity	: 1.58 – 1.62 g/mL				
	Maximum tensile strength	: 1.6 N/mm²	ASTM D412			
	Elongation at break	: 180 %	ASTM D412			
	Shore A hardness	: 40	ASTM C661			
	Low VOC compliance	: Yes	SCAQMD Rule 1168			
	VOC content	: 9.49 g/L	USEPA Test method 24			
FEATURES	 Certified Green Sealant Adhesive Single-component - Ready for use, no mixing required Resistant to aging - Permanently elastomeric Free of water, 100% solid content - No dimensional changes in wood Free of solvent - Non-teching & no shrinkage Free of isocyanate - Non-hazardous Low odor & low VOC - SGBPLS certified, meets LEED/SCAQMD rule 1168 Notched trowel ridges hold firm - Minimize hollow spots by bridging gaps Rapid strength build-up and short curing time - Fast job completion Easy surface clean up - Easy cleaning on prefinished wood Non-flammable, non-hazardous, stable shelf life - Easy storage

(Ltech)		Technical Data Sheet			
		VT-630 MS Flooring Adhesive			
Issuance date: 27/12/11		Revision date: 09//20	Revision No.: 20-03		
VT-630 MS Flooring Adhesive	PREPARATION	 Subfloor must be solid and structurally sound, flat, smooth, clean, permanently dry, no indentations and anti-adherents, as well as resistant to pressure. Subfloor must be free of dust, dirt, grease, wax, loose paint, oil, sealers of ANY type, curing compounds, bond breakers, asphaltic residue, liquid adhesive remover, strippers, chemicals, or any other foreign substances that can potentially affect bonding. Cleaning the subfloor must be flat to 3mm over 3 meter, otherwise it will increase the risk of hollow spots under timber overlay. Any existing coating or adhesives must be completely removed. Mechanical treatment (e.g. shot blasting, grinding or sanding) may be required to achieve subfloor conditions mentioned above. It is recommended to verify that the moisture content of the slab is <5.5%, and moisture vapour transmission rate is <15g/m2 per 24 hour before commencing installation works. Excessive moisture migration and subsequent wood swelling or cupping, ground floor slabs or new concrete slabs that do not meet the moisture conditions above are recommended to be coated with V-tech VT-507 FloorSeal Epoxy Moisture Barrier. Before installation, check moisture content of wood is as recommended by wood flooring manufacturer (generally 9% ±2%). Radiant heated subfloors should be turned off 24 hours prior to and during installation to prevent premature curing of the adhesive. Recommended air temperature during installation – between 10°C - 35°C (50°F - 95°F), Relative Humidity – between 40% and 75%, subject to the requirements specified by wood flooring manufacturer. Do not install if the walls and ceilings of the area are not dry (e.g. after plastering or painting etc.) 			
	APPLICATION DIRECTION	 Sausage sachet: Place the sausage sachet in a suitable application of the nozzle to suit the application. Apply the adhesive with appropriate force and Make sure the wood is positioned on subfloor version of the substant of the adhesive with the proper notched Avoid adhesive pools and excessive adhesive through the adhesive at a 45 degree angle. Place wood in the adhesive within working the firmly or tamp down with a rubber hammer to slip and move at first so be sure to secure the patterns. Minimum 80% of adhesive contact coverage installation of parquet floor. Place heavy object the curing time, especially on bowed boards necessary to sort out bowed planks before installing near a solid object or wall, leavod too tight against a stationary object will new which may cause a failure. When the installation is complete, use wedge while adhesive dries. Remove wedges after in hours) to allow for normal expansion of wood, wood flooring to buckle and pop off the substration. Note: Follow wood flooring manufacturer's guide precautions for installation. 	speed. within the working time of the adhesive. open, the entire contents should be used trowel, apply uniformly on the subfloor. e thickness by passing the trowel evenly me, correctly position it and press down ensure good overall contact. Wood may e initial row to limit movement and hold the is recommended to achieve proper ts to hold the wood firmly in place during s or boards over low spots. It may be allation. ave ample room for expansion. Installing of allow room for normal wood expansion, as or some object to hold wood in place itial setting of adhesive (approximately 2 Failure to remove wedges can cause the tte. urs. Wait a minimum of 24 hours before

VT-630 MS Flooring Adhesive		 finger block parquet 	Square Not	Line Line Line Line Line Line Line Line	Up to 2.0 m ² /L	
		 ≤13mm solid wood ≤13mm engineered wood 	V No	arm arm	Up to 1.4 m ² /L	
			V No	Lamm Smm Lamm Lamm Lamm Lamm Lamm Lamm Lamm Lamm	Up to 1.2 m ² /L	
		 9-13 mm solid wood >13 mm engineered wood <19 mm parquet 	Square Not	the 6 mm x 6 mm x 3 mm	Up to 1.0 m ² /L	
		 >13 mm solid wood 4' x 4' plywood 			Up to 0.9 m ² /L	
		Square Notch 6 mm x 6 mm x 6 mm Trowel type and size are selected based on flooring type. Coverage rates shown are only guidelines. Coverage will vary with trowel size/type, angle the trowel is held to the subfloor, and the absorption level of substrate. Generally, use a fine trowel for wood of smaller sizes and/or smooth substrates, and a coarse trowel for wood of larger sizes and/or rough substrates.				
	LIMITATIONS	 ATIONS Below grade applications are subject to wood flooring manufacturer's recommendation Do not use on wet, dusty, contaminated or friable substrates. Do not dilute the adhesive. Do not install solid wood over cutback residue or over VCT/vinyl. Resistant to water, dilute acids, and diluted caustic solutions, temporarily resistant to fuel, animal fats and oils, not resistant to organic acids, concentrated caustic solutions. Will not prevent damage to wood flooring induced by excessive moisture transmission due to environmental factors like leaky pipe. 				
	CAUTION	Keep out of reach of children. Contains aminosilane. May produce an allergic reaction. Safety data sheet available on request. For further health and safety information, consult the latest safety data sheet.
