Technical Data Sheet

VT-621 All Purpose MS Sealant

Revision No.: 20-02

Issuance date: 14/02/11 Revision date: 06/11/20

VT-621 All Purpose MS Sealant

LÓW CONTENT

Medium Modulus One-Component MS Sealant

BASE

One-component MS Polymer

PHYSICAL STATE

Soft paste

COLORS

White Black Grey

TACK-FREE/ SKIN-FORM TIME

5 – 20 minutes (at 25 °C & 50% R.H.)

PACKAGING

290 mL/cartridge (20 cartridges/carton)

SHELF LIFE

9 months

STORAGE

Store in a dry and cool place with temperature below 30 °C

APPLICATION TEMPERATURE

5 °C – 40 °C

SERVICE TEMPERATURE

-30 °C – 90 °C

DESCRIPTION

VT-621 All Purpose MS Sealant is a single-component, high-performance sealant based on advanced MS Polymer technology. It is solvent, silicone and isocyanate free. It is excellent in UV, weather and temperature resistance. Its adhesion over a wide variety of substrates is very good, and is paintable with most types of common industrial paints.

TECHNICAL DATA

Curing system : Moisture curing Specific gravity : 1.49 g/mL

Maximum tensile strength : 1.7 N/mm² ASTM D 412

 : 0.60 N/mm² (6.2 kgf/cm²)
 ISO 8339

 Elongation at break
 : 290 %
 ASTM D 412

 Lap shear strength
 : 1.4 N/mm²
 ASTM D1002

 Shore A hardness
 : 42
 ASTM C661

Low VOC compliance : Yes SCAQMD Rule #1168 VOC content : 52.39 g/L USEPA Method 24

FEATURES

- High strength and elastic
- Good UV resistance
- Paintable

- Isocyanate-free No air bubbling
- Solvent-free No shrinkage
- Primerless bonding to most substrates

APPLICABLE TESTS / STANDARDS

VT-621 meets the requirements of:

Low VOC - USEPA Method 24 under SCAQMD Rule 1168

APPLICATION

Suitable for high strength sealing or bonding in construction, automotive, marine, and industrial applications. It works on various substrates like plastics, metals, rubber, natural materials (wood, plywood, leather, cloths, paperboard etc.) & inorganics (concrete, mortar, natural stone, tile, glass, porcelain etc.).

PREPARATION

- Substrate surface must be dry and clean; free of dirt, grease, oil, or standing water.
- Use the two-cloth method to clean if surface is dirty. (Refer application direction)
- For a neat finishing, use masking tapes and remove it within the working time.
- 602 Primer is recommended for porous substrates such as concrete for excellent adhesion.
- For sealant designs with depths of over 10 mm, use approved backing materials.

APPLICATION DIRECTION

Two-cloth Method

- Use a clean, lint-free, and absorbent cloth.
- Pour an appropriate amount of solvent onto the cloth.
- DO NOT dip the cloth into the solvent container as it could contaminate the cleaning solvent.
- Wipe vigorously to remove any contaminant and check if there is any contaminant picked up.
- Continuously wipe the surface until no contaminant is picked up.
- Always rotate the cloth to make sure a clean area of the cloth is used to wipe the surface.
- Immediately wipe the surface with solvent with a separate clean cloth. This will ensure that
 the surface to be free of any dirt or contaminant left by the first wipe.
- Make sure that the surface is dried off completely before applying primer or sealant

Choice of solvent

- The choice also solvent or cleaning agents used to clean the surface will affect the adhesion of sealant.
- Detergents and soap solutions should not be used as they will leave a film on the surface.
- On the other hand, oil-based solvents (mineral spirits, turpentine, kerosene, etc.) would leave oily stains on the substrates.
- 50% solution of isopropyl alcohol (IPA) and water is generally recommended to wipe minor surface contaminants.
- For tougher stains, use ketones such as acetone or methylethylketone (MEK).
- For oil and grease, MEK and toluene is recommended.
- Always test the solvent or cleaning agent on an inconspicuous area of the substrate, to make sure it will not damage the substrate.

Technical Data Sheet

VT-621 All Purpose MS Sealant

Issuance date: 14/02/11 Revision date: 06/11/20 Revision No.: 20-02

VT-621

All Purpose MS Sealant

Cartridges:

- 1. Cut the cartridge tip carefully.
- 2. Cut the nozzle into an appropriate diameter at an angle of approximately 45° to 60°.
- 3. Use a caulking gun and extrude the sealant with a single bead.
- 4. Tool the sealant bead with a clean and dry tool before the sealant skins for a smooth finishing.

CLEAN UP

- Wet sealants can be cleaned up with acetone or mineral spirits.
- Cured sealants can only be removed mechanically.

JOINT DESIGN

- Joint dimension should be designed by taking into consideration the movement capability of the sealant and the anticipated joint movement
- Generally the joint width-to-depth ratio is 2:1 for joint width ≥12 mm, or 1:1 for joint width <12 mm
- Joint width: minimum = 6 mm, maximum = 35 mm *
- Joint depth: minimum = 6 mm, maximum = 12 mm
- * Sealing joints with larger joint width is possible but sealant may sag in vertical applications.

COVERAGE

Width	Depth	Coverage (290 ml) *
6 mm	6 mm	7.32 meter
10 mm	10 mm	2.64 meter
20 mm	10 mm	1.32 meter
25 mm	12 mm	0.88 meter

- The coverage figures shown above are approximate lineal meter run based on 10% wastage assumption. Actual coverage may vary.
- Calculation formula:

 $X / [(Y \times Z) \times 1.1] = Coverage$

X = volume of cartridge (or sausage) in ml,

Y = joint width in cm, Z = joint depth in cm,

1.1 = 10% wastage assumption,

Coverage = lineal meter run in cm per cartridge (or sausage)

LIMITATIONS

Not recommended for the following applications:

- Below waterline or permanent water immersion.
- Outdoor sealing/bonding adjacent to glass substrates.
- Polyethylene, polypropylene, polytetrafluoroethylene (Teflon), neoprene, and bituminous surfaces.
- Overcoated with
 - Alkyd resin paint cure inhibition to the paint
 - Chlorinated paint staining issue
 - Oil based paint not compatible
- Used in trafficable joints greater than 10 mm width. For trafficable joint above 10 mm width, a steel cover plate is required.

CAUTION

Keep out of reach of children. Contains aminosilane. May produce an allergic reaction. Safety data sheet available on request. For further health and safety information, consult the latest safety data sheet.
